# W

We are all very aware of how important our overall appearance is and our hair is our crowning glory. Unfortunately, not everyone is fortunate to have good hair due to many different reasons.

Here at Limerick Wig Clinic I care and want to help. I am a specially trained stylist with many years' experience as a wig consultant who can assist you in selecting hairpieces, caps, turbans, etc to suit your colour and appearance. My service is strictly confidential in a specially designed salon for your comfort. Please call for your private consultation or come and view with no obligation to buy. I deal with all aspects of hair loss.

## The Necessity Wearer

Alopecia has many different forms, for instance Alopecia Totalis causes complete loss of hair growth. There are a wide range of bespoke hairpieces available that can be personalised to suit you and your face shape whether you choose fibre hair or human hair which is virtually undetectable to both sight and touch.

Chemotherapy & Radiotherapy treatment can also cause temporary partial or full hair loss. Patients are often anxious and concerned with finding a wig which is natural and provides a secure fit. In my experience people are often surprised how realistic the modern-day wigs are. I am HSE approved which means if you are a medical card holder you may be entitled to an allowance towards your wig. I can advise on documentation required and handle the administration if you wish to make it as stress free as possible.

A percentage of each wig bought will be donated to the Mid-West Cancer Centre. We have a range of beautifully designed headwear, turbans, caps, and hats specifically for hair loss wearers, made from natural materials. They are gentle to sensitive and delicate skin.

**LIMERICK WIG CLINIC**

PROVIDING PRIVATE & PROFESSIONAL CONSULTATIONS

**Male and Female Pattern Baldness** occurs when the hair follicle shrinks over time. The hair thins mainly on top and crown areas. Top pieces are the perfect solution, ideal for everyday use. There are three different base size toppers covering front, top and crown areas.

**Thinning Hair** is much more gradual there is less texture where the scalp is exposed beneath. The hair enhancer attaches to your existing hair for a secure hold, gives you 30-50% more volume and is cut to suit you ensuring a seamless integration with your own hair.

### **The Fashion Wearer**

Anyone male or female can enjoy the luxury of owning his or her own hairpiece. Imagine going from blonde to red or any colour imaginable.

A collection of hairpieces that are a less expensive alternative to extensions, 3/4 hairpieces, ponytails, buns and even fringes are available in fibre hair pre-styled or human hair which you can style yourself whether you are doing the shopping, going out on the town, special occasions or going on holidays these are the perfect addition.

If you are finding your own hair hard to style or it is damaged from colouring, match your current shape, colour and style for an instant glamorous look.

### **Our Wigs**

The vast majority are ready to wear, easy to fit and with very little after care. There are many collections available to choose from, fibre hair, fully handmade pieces to 100% human hair.
